

Oilfield Chemicals

Techniques International Corporation has been designed to afford the utmost flexibility in meeting the special needs of the petroleum industry. The specialty chemicals division offers a complete line of chemicals for the oil industry from drilling and production to well stimulation and enhanced oil recovery water injection chemicals.

Drilling Specialty Chemicals

- Drilling lubricants & surfactants
- Drilling mud emulsifiers
- Bentonite extenders
- Corrosion inhibitors
- Pipe free surfactants
- Water-soluble liquid polymers
- Oxygen scavengers
- Hydrogen sulfide scavengers
- Liquid defoamers
- Fibrous loss circulation materials

Workover Chemicals

- Calcium chloride
- Potassium chloride
- Calcium bromide
- Zinc bromide solution
- HEC polymers
- Liquid HEC polymer
- Corrosion inhibitors
- Down hole surfactants (casing cleaner)
- Solvent base pipe dope remover

Production Chemicals

- Paraffin solvents
- De-emulsifiers
- Down hole surfactants
- Tri-ethylene glycol
- Bactericides
- Scale inhibitors
- Xylene

Maintenance chemicals

- Rig wash
- Pipe coat
- Pipe dope

Cementing Additives

- Retarders
- Accelerators
- Friction reducers
- Fluid loss additives
- Spacers
- Corrosion inhibitors/Washers
- Gas control densers
- Defoamers

Water Injection

- Poly-electrolytes
- Oxygen scavenger
- Defoamers
- Scale inhibitors
- Corrosion inhibitors
- Sulfate reducing bactericides

Well Stimulation

- Acid corrosion inhibitors
- Surfactants
- Antislug agents
- Gelling agents
- Foaming agents
- Defoamers
- Clay stabilizers

In addition to the above chemicals, Techniques is equipped with a whole line of mud additives and oil well cement supplies from quality and competitive sources.
